

Air-Cooled Single Cylinder Motorcycle Engine

This is an air-cooled, single-cylinder motorcycle engine. It features cooling fins on the cylinder and head for air cooling.

Overview

High-Performance Air-Cooled Engine

This single-cylinder motorcycle engine is engineered for reliability and efficient thermal management. Featuring a robust air-cooled design with integrated cooling fins, it ensures consistent performance even during extended operation. The unit comes fully equipped with essential components, including a starter motor and oil filter housing, making it a ready-to-install solution for motorcycle assembly or replacement needs.

Technical Specifications

Cooling System	Air-cooled
Engine Configuration	Single cylinder
Finish	Silver finish (crankcase and cylinder head)

Key Features

Included Components

- Starter motor
- Oil filter housing
- Cooling fins

Condition

New • Excellent Condition
