

Air Cooler Fan Motor

This motor is designed for air cooler fan applications. It features a robust construction with a metallic housing and mounting brackets for secure installation.

Product Overview

High-Efficiency Air Cooler Fan Motor

The YFD Series motor is a professional-grade component specifically engineered for air cooler fan systems. Featuring a robust metallic housing and secure mounting brackets, it is built to ensure reliable operation and optimal air circulation. This durable motor provides long-lasting cooling efficiency, making it an ideal choice for diverse industrial and commercial air cooling applications.

Technical Specifications

Series	YFD Series
Application	Air Cooler, Fan Motor, Industrial Cooling

Construction

Installation Features

- Secure mounting brackets
- Cylindrical rotor shaft
- Multiple mounting points

Housing	Metallic
