

Air Curtain Fan

The air curtain fan creates a continuous air barrier across an opening. It separates indoor and outdoor environments, preventing the entry of insects, dust, and pollutants, while also conserving energy.

Overview

High-Efficiency Air Curtain

This air curtain fan is designed to create a continuous, high-velocity air barrier across doorways, effectively separating indoor and outdoor environments. By preventing the entry of insects, dust, and pollutants, it helps maintain a clean and controlled atmosphere while conserving energy by reducing heat loss or gain. Its compact, streamlined design and durable construction make it a versatile and reliable solution for various commercial and residential applications.

Performance & Features

Airflow Mechanism	Cross-flow (/A)
Primary Benefits	Insect Protection, Dust Prevention, Energy Conservation, Pollutant Barrier
Adjustable Settings	Yes

Installation & Maintenance

Maintenance

Easy Installation • Low Maintenance

Suitable Applications

- Commercial doorways
- Residential entrances
- Retail storefronts
- Office buildings
