

Air Cushion Load Moving Modules

These air bearing and caster modules offer a capacity from 22,000 to 105,600 lbs. The air cushions are designed for moving heavy equipment, reducing effort and preventing floor damage.

Product Overview

Air Cushion Load Moving Modules

These air cushion load moving modules are engineered for the smooth and efficient transport of heavy loads, even over floor gaps and steps. Originally designed for demanding theater applications, they offer a durable, lightweight, and reliable solution for industrial material handling. Their design minimizes floor damage while allowing for precise movement of heavy equipment.

Performance Specs

Available Load Capacities

- 10T
- 16T
- 20T
- 32T
- 48T
- 60T

Capacity Range (LBS)

22000 LBS

Minimum Capacity

105600 LBS

Maximum Capacity

Design & Features

Configuration Options

Four-module configuration • Six-module configuration

Key Features

Lightweight, Durable Construction, Gap & Step Navigation, Industrial Grade, Cleanroom Suitable
