Product Overview

Product Show

PAN19 model designed for heavy-duty commercial vehicle braking systems.

Robust construction designed for consistent performance in commercial applications.

High-Performance Air Disc Brake Caliper

This PAN19 air disc brake caliper is engineered specifically for commercial vehicles, providing reliable and consistent stopping power for trucks, buses, and trailers. Built with robust steel construction, it is designed to withstand the demanding requirements of heavy-duty applications while ensuring extended service life. The caliper incorporates advanced friction technology to optimize brake pad wear and reduce operational noise, making it an ideal choice for professional fleet maintenance.

Technical Specifications

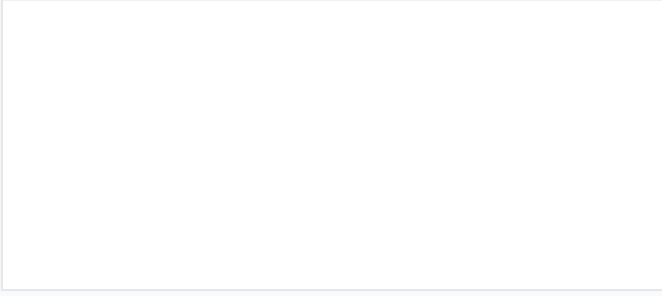

OEM Model	PAN19
Material	Steel
Compatible Vehicles	Truck, Bus, Trailer

Quality & Compliance

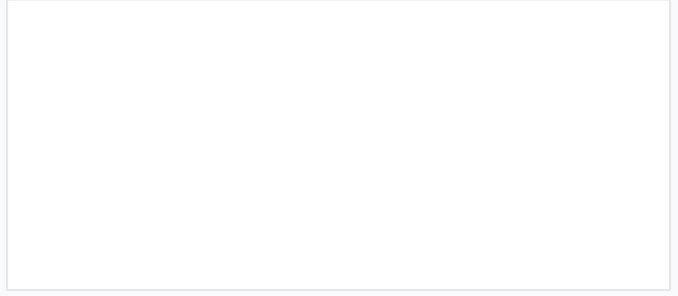

Certifications

IATF16949

Maintenance & Repair

Essential hardware components included for maintenance and installation.

Comprehensive repair kit components engineered for durability and safety.

Included Components

- Guide pins
- Bushings
- Seals
- Boots
- Springs
- Pistons
