

# Air Hammer Drill

This pneumatic tool combines hammering and drilling functions. It is suitable for a variety of tasks in construction, automotive repair, and metalworking.

## Product Overview

### Professional Grade Air Hammer Drill

This pneumatic air hammer drill is engineered for heavy-duty drilling and demolition tasks in industrial environments. Designed for efficiency and reliability, it delivers consistent impact force to handle concrete, masonry, and stone applications with ease. Its robust construction ensures long-term durability, making it an essential tool for construction and renovation professionals.

## Technical Specifications

### Tool Type

Pneumatic • Heavy Duty

### Power Source

Compressed Air (Pneumatic)
