

Air Intake Hose for Cleaning Machines

Durable and flexible, this air intake hose is designed for cleaning machines. Constructed from high-quality rubber, the hose features a corrugated design for enhanced flexibility and resistance to collapse.

Product Overview

High-Performance Air Intake Hose

This durable and flexible air intake hose is specifically engineered for industrial cleaning machines. Its corrugated rubber construction provides excellent resistance to collapse while maintaining high flexibility for complex installations. Designed to withstand demanding environments, this hose offers superior resistance to abrasion and chemicals, ensuring reliable airflow and extended service life.

Physical Properties

Material	High-quality rubber
Design Features	Corrugated, Flexible, Collapse-resistant

Compatibility & Installation

Connection Type	Angled shape for easy component integration
Auxiliary Connections	Yes

Performance & Durability

Durability Metrics

1 High Chemical Resistance	1 High Abrasion Resistance
