

Air-Powered Drum Agitator for 55-Gallon Drums

This air-operated agitator is designed for use with 55-gallon drums. It utilizes compressed air to power the mixing mechanism, providing adjustable mixing speed.

Product Overview

High-Performance Mixing Solution

This air-powered drum agitator is engineered for the efficient blending and mixing of materials directly within standard 55-gallon drums. Utilizing reliable compressed air, it offers adjustable speed control to suit various industrial viscosity requirements. Built for durability, this unit is an ideal choice for consistent, heavy-duty mixing applications in sectors such as paint, chemical, and food processing.

Technical Specifications

Power Source	Compressed Air
Drum Compatibility	55-Gallon
Speed Control	Adjustable via air pressure

Key Features

Operational Benefits

- Efficient material blending
- Adjustable mixing speed
- Durable industrial construction
- Easy installation and operation

Suitable Industries	Paint, Chemical, Food Processing
---------------------	----------------------------------
