

Air Powered Load Moving System

Air casters, also known as air bearings or air skates, are air powered moving rollers. They facilitate the smooth and precise movement of heavy loads by reducing friction.

Product Overview

Air Powered Load Moving System

This air-powered load moving system is designed for the precise and efficient transport of heavy industrial equipment. By utilizing air bearing technology, the system significantly reduces friction, allowing for smooth and controlled movement of loads ranging from 10 to 48 tons. These systems are ideal for environments requiring careful positioning of heavy machinery.

Technical Specifications

Load Capacity Range

10 tons

Minimum Capacity

48 tons

Maximum Capacity

Available Models

- 10.0T
- 16.0T
- 20.0T
- 32.0T
- 48.0T

Logistics

Packaging Standard

Standard • Seaworthy • Export Package

Origin

ShanDong, China

Stock Status

In stock (large quantities subject to lead time)
