

# Air-Powered Mini Agitator for Small Containers

This air-operated mini agitator is designed for efficient mixing in small containers. It utilizes compressed air to power a rotating impeller, ensuring thorough blending of liquids.

## Overview

### Compact Air-Powered Mixing Solution

This air-operated mini agitator is engineered for efficient and reliable mixing within small containers. By utilizing compressed air to power its rotating impeller, it ensures thorough blending across a variety of liquid viscosities. Its compact, lightweight design makes it an ideal choice for laboratory settings, paint mixing, and adhesive applications where space and precision are critical.

## Technical Specifications

Power Source	Compressed Air
Construction	Corrosion-resistant
Key Features	Adjustable Speed Control, Compact Design, Lightweight, Easy Mounting

## Applications

### Suitable For

- Laboratory applications
- Paint mixing
- Adhesive blending
