Product Overview

Professional Air Pressure Drain Clearing Solution

This high-performance air pressure drain clearing tool is designed to effectively remove stubborn blockages in indoor facilities, including vegetable-rinsing basins, washing basins, kitchens, bathrooms, and lavatories. By utilizing a sudden, strong piercing pressure, the device efficiently clears pipe obstructions without the need for harsh chemicals. It is engineered for safe and easy operation, featuring an integrated pressure system that can withstand up to 0.7 Mpa.

Technical Specifications

Maximum Operating Pressure

0.7 Mpa

Max Pressure

Included Equipment

- Air release extension pipe
- Adaptor
- Steel pipe

Suitable Applications

Vegetable-rinsing basins, Washing basins, Kitchen sinks, Bathroom drains, Lavatories

Operational Features

Simple and Safe Operation

To operate, inflate the pump with the appropriate gas pressure based on the severity of the blockage, typically remaining under 0.7 Mpa. Press the seal piston firmly against the pipe opening and release the pressure quickly to dislodge the obstruction. The included rubber adaptor is reversible, accommodating various drain opening diameters and shapes, while the extension pipe allows for use in complex working environments.
