

Air-Pressure Ventilating Fan

This air-pressure ventilating fan provides efficient air extraction. The durable metallic construction ensures longevity and reliability.

Overview

High-Performance Ventilation

This air-pressure ventilating fan is engineered for efficient air extraction in demanding environments. Featuring a robust metallic construction, it ensures long-term reliability and durability. The balanced blade design provides optimal airflow while maintaining quiet operation and high energy efficiency.

Technical Specifications

Model Identifier	VE-CF 5000K
Material	Metallic

Features

Key Features	High-Performance, Durable Construction, Quiet Operation, Energy Efficient
