

Air-Pressure Ventilating Fan with Full Plastic Housing

This air-pressure ventilating fan is constructed from durable, lightweight plastic. It features a robust impeller, protective grille, and full plastic housing for corrosion resistance and easy cleaning.

Overview

Deluxe Air-Pressure Ventilation Solution

This deluxe full plastic air-pressure ventilator is engineered for efficient air extraction and ventilation across various indoor environments. Constructed from durable, lightweight plastic, it features a robust impeller and a protective safety grille to ensure long-lasting performance. The specialized air-pressure mechanism optimizes airflow while the full plastic housing provides excellent resistance to corrosion and allows for easy cleaning.

Key Features

Core Advantages

- Full plastic housing for corrosion resistance
- Air-pressure mechanism for optimal airflow
- Integrated protective grille for safety
- Lightweight and durable construction
- Easy-to-clean surfaces

Technical Design

Housing Material	Full Plastic
Mechanism	Air-Pressure Ventilating
Key Components	Robust Impeller, Protective Grille, Plastic Housing

Applications

Recommended Environments

Kitchens • Bathrooms • Enclosed Spaces

Primary Function	Air extraction and ventilation
