

Air Pressure Wine Opener

This air pressure wine opener uses air pressure to remove corks from wine bottles. A slender needle is inserted through the cork, and air pressure gently pushes the cork out without damage.

Product Overview

Effortless Cork Removal

The Air Pressure Wine Opener utilizes patented air pumping technology to remove corks cleanly and efficiently. By inserting a slender needle through the cork and pumping air, the device gently pushes the cork out without the need for twisting, pulling, or electrical power. This manual, reusable tool is designed with an ergonomic handle and a transparent housing for a safe, visual, and reliable wine opening experience.

Technical Specifications

Mechanism	Air pressure pumping
Power Source	Manual (No batteries required)
Key Features	Patented air pumping technology, Ergonomic handle, Transparent housing, Non-destructive needle

Usage & Compatibility

Compatibility

- Most standard wine bottles
- Various cork types
