

# Air Purification System

This air purification system is designed for household use. It effectively removes pollutants and allergens, contributing to a healthier indoor environment.

## Overview

### Professional Grade Air Purification

This advanced air purification system is designed to provide high-efficiency air filtration for professional environments. Engineered for reliability and performance, it effectively removes airborne contaminants to ensure a clean and safe workspace. Its robust design makes it an ideal solution for facilities requiring consistent air quality management.

## Core Performance

### Filtration Efficiency

**99.97 %**

Particle Removal

### System Type

Industrial Grade • HEPA Compatible

## Certifications

### Compliance Standards

ISO 9001, CE Certified, RoHS Compliant
