

Aircraft Tow Tractor TD25

This aircraft tow tractor is designed for efficiently moving aircraft in airport environments. It features a durable chassis, a powerful engine, and a comfortable operator cabin.

Overview

Compact Aircraft Towing Solution

The TD25 fuel baggage tractor is a robust and versatile solution engineered for efficient ground handling in airports, shipyards, and industrial warehouses. Equipped with a high-performance engine and advanced hydraulic transmission, it ensures reliable towing power and operational economy. Designed for operator comfort and safety, it features a spiral spring absorption system and a vacuum booster braking system to handle demanding daily tasks.

Technical Specifications

| | |
|--------------|--|
| Engine Type | Kohler |
| Transmission | Hydraulic automatic transmission (ZF) |
| Steering | Hydraulic power re-circulation ball type |

Safety Systems

| | |
|----------------|--|
| Braking System | Vacuum booster hydraulic dual re-circulation four-wheel system |
| Suspension | Spiral spring hydraulic cylinder absorption |

Applications

| | |
|-----------------------|---|
| Suitable Environments | Airport, Shipyard, Railway Station, Warehouse |
|-----------------------|---|
