

Airport Cargo Loader

This heavy-duty machinery efficiently transfers cargo containers at airports. It is designed to support logistical operations by moving cargo to and from aircraft.

Product Overview

Reliable Airport Ground Support

This heavy-duty airport cargo loader is designed for efficient ground handling operations, facilitating the seamless transfer of cargo containers to and from aircraft. With a proven track record spanning decades, this equipment has been deployed in numerous major international airport infrastructure projects. It is built to meet the rigorous demands of airport logistics, ensuring safety and operational continuity.

Project History

Major Airport Deployments

Airport Project	Year(s)
Beijing Capital International Airport	2000
Mianyang Nanjiao Airport	2000
Haikou Meilan International Airport	1997-2000
Beihai Fucheng Airport	1995-1998
Zhengzhou Xinzheng Airport	1996
Fuzhou Changle Airport	1995-1996
Harbin Taiping International Airport	1995
Xiamen Gaoqi International Airport	1993
Shenzhen Huangtian Airport	1990-1993
Shanghai Hongqiao International Airport	1989
