

AISI 304/316 Stainless Steel Wire Rope

This stainless steel cable is made from AISI 304 and AISI 316. It features high tensile strength and is suitable for various applications.

Product Overview

High-Performance Stainless Steel Wire Rope

This premium-grade stainless steel wire rope is engineered for exceptional durability and corrosion resistance, making it an ideal choice for demanding environments. Available in a comprehensive range of constructions and diameters, it provides reliability for critical applications including rigging, construction, and marine hardware. Manufactured to international standards, these cables ensure consistent performance and longevity under high-stress conditions.

Technical Specifications

Construction

- 1x7
- 1x19
- 7x7
- 7x19
- 6x7+FC/IWS
- 6x19+FC/IWRC/IWSC
- 19x7
- 6x37+FC/IWRC
- 6x36WS+FC/IWRC

Tensile Strength

1570 N/mm²
Tensile Strength

1670 N/mm²
Tensile Strength

1770 N/mm²
Tensile Strength

Surface Treatment

Bright • Annealed • Electro polished

Material Grade

AISI 304, AISI 316, AISI 304L, AISI 316L, Non-magnetic

Diameter Range

0.3mm to 32mm

Lay Direction

R.H.O.L and L.H.O.L

Compliance & Logistics

Standards Compliance

AISI, ASTM, DIN, EN12385-4, BS, GB, JIS

H.S. Code

7312100000

Packing

Plywood reels, plastic spools, or as per requirement

Applications

Typical Applications

- Rigging
- Construction
- Aircraft
- Metallurgy
- Hardware
