

AISI 316L Stainless Steel Wire Rope 1x19 Strand

This high-quality AISI 316L stainless steel wire rope has a 1x19 strand construction. It offers corrosion resistance, high strength, and durability.

Product Overview

AISI 316L Stainless Steel Wire Rope

This high-performance AISI 316L stainless steel wire rope features a 1x19 strand construction, engineered for maximum durability and minimal stretch. Renowned for its exceptional corrosion resistance, it is an ideal solution for demanding marine, architectural, and industrial rigging applications. The rope is available in a wide range of diameters to suit diverse project requirements while maintaining high tensile strength standards.

Technical Specifications

Material Grade

AISI 316L

Construction

1x19 Strand

Diameter Range

0.3mm - 32mm

Surface Treatment

Bright, Annealed, Electro polished

Performance Metrics

Tensile Strength

1570 N/mm²

Option 1

1670 N/mm²

Option 2

1770 N/mm²

Option 3

Compliance & Standards

Standards

- AISI
- ASTM
- DIN
- EN12385-4
- BS
- GB
- JIS

Logistics & Usage

Packing Methods

- Plywood reels
- Plastic spools
- Customized per requirement

Common Applications

Rigging, Construction, Aircraft, Metallurgy, Hardware

HS Code

7312100000
