

Alkaline C Size Batteries

Alkaline C size batteries provide a reliable power source for various devices. These batteries are mercury and cadmium free.

Product Overview

Reliable Power Solution

These C size alkaline batteries are engineered to provide consistent and long-lasting power for a wide range of household electronics and toys. Designed with safety in mind, they are completely free of mercury and cadmium, making them an environmentally conscious choice for everyday use. Their robust construction ensures reliable performance across various applications requiring standard C size power.

Technical Specifications

Battery Size	C (LR14)
Nominal Voltage	1.5 V
Chemical System	Super Alkaline

Compliance & Safety

Certifications	CE
Environmental Standards	Mercury Free, Cadmium Free
