Overview

High-Performance Alkaline Power

These alkaline dry cell batteries are engineered for long-lasting, reliable power across a wide range of electronic devices. Featuring an environmentally friendly composition, they offer an extended shelf life and consistent service life for everyday applications. With a robust metal jacket design, these batteries provide a stable 1.5V output, ensuring competitive performance and value for professional use.

Technical Specifications

| | |
|---------------------|---|
| Nominal Voltage | 1.5 V |
| Chemistry | Zinc / Manganese Dioxide (Zn/MnO ₂) |
| Jacket Material | Metal |
| Shelf Life | 2 years |
| Available Packaging | Shrink Wrap, Blister Pack |

Performance Data

Performance by Model

| Model | Test Condition | Cut-off Voltage | Duration |
|------------|----------------|-----------------|----------|
| AAA (LR03) | 39°C 2H/d | 0.9V | 160mins |
| AA (LR6) | 39°C 2H/d | 0.9V | 380mins |
| C (LR14) | 39°C 2H/d | 0.9V | 19hours |
| D (LR20) | 39°C 2H/d | 0.9V | 29hours |
| 9V (6LR61) | 180°C 30'd | 4.8V | 18hours |
