

All-in-One Heat Pump Water Heater

This all-in-one heat pump features top air inlet and outlet and uses R417A/R410A/R22 refrigerant. It provides cooling and dehumidification and heats water with a COP of 3.5.

Overview

Efficient Water Heating Solution

This all-in-one heat pump water heater is engineered for high-efficiency operation in both residential and commercial settings. Built with durable materials to ensure long-lasting performance, the unit features a user-friendly digital display for intuitive control and monitoring. It utilizes environmentally friendly refrigerant and is designed for low-noise operation, making it an ideal choice for modern, sustainable infrastructure.
