

All-in-One Solar Street Light

This all-in-one solar street light automatically turns on and off. It features an integrated solar charge controller that turns off the LEDs at dawn and automatically activates the LED street lights when sunlight is insufficient.

Product Overview

Integrated Solar Illumination

This all-in-one solar street light combines a high-efficiency solar panel, battery, and LED array into a single, self-contained unit. It provides a sustainable, grid-free lighting solution that automates dusk-to-dawn operation. Designed for durability and intelligence, it features motion-sensing technology that optimizes energy usage while ensuring reliable performance in diverse outdoor environments.

Operational Features

Lighting Profile	Automated dusk-to-dawn with motion-sensing optimization
Low Power Mode	15 %
Detection Technology	Inductor-based motion sensing

Applications

Ideal Environments	Yard, Garden, Park, Street, Roadway, Pathway, Parking Lot, Campus, Farm & Ranch, Plaza
--------------------	--

Technical Details

System Components

- Integrated Solar Panel
- High-output LED Array
- Lithium Battery
- Intelligent Charge Controller

Stop Charging Voltage	5 V
