

All-Terrain Tracked Recovery Vehicle

This all-terrain tracked recovery vehicle is designed for extreme environments. It features a robust tracked chassis, a powerful engine, and advanced recovery systems for efficient vehicle extraction and repair.

Overview

Rugged Recovery Capability

This all-terrain tracked recovery vehicle is engineered for high-stakes operations in the most challenging environments. Designed with a robust tracked chassis, it provides superior mobility across mountains, deserts, and snow-covered terrain. It comes fully equipped with essential recovery tools including winches, cranes, and power generation systems to ensure efficiency in emergency rescue and heavy-duty field tasks.

Operational Capabilities

Integrated Equipment

- Winches
- Searchlights
- Generators
- Cranes

Primary Applications

Emergency Rescue • Construction Support • Mining Operations • Vehicle Extraction

Terrain Suitability

Mountain, Desert, Snow, Harsh Field Environments
