

All-Terrain Vehicle (ATV) for Off-Road Use

This all-terrain vehicle (ATV) is designed for off-road use. It features a robust frame, knobby tires for enhanced traction, and a front bumper for protection.

Overview

Built for Performance

This all-terrain vehicle is engineered specifically for off-road environments, prioritizing durability and rider control. Featuring a robust frame and specialized knobby tires, it provides excellent traction and stability on uneven surfaces. The integrated suspension system with visible springs ensures a smooth ride by effectively absorbing shocks, making it suitable for both recreational and utility applications.

Key Features

Safety & Control

- Front bumper protection
- Handlebar steering system
- Single-seat configuration

Design Highlights

Off-Road Optimized, Robust Frame, Enhanced Traction, Shock-Absorbing Suspension

Performance

Suspension System

Spring-based shock absorption

Tire Configuration

Knobby off-road tires
