Overview

Optimized All-Terrain Performance

This all-terrain vehicle features advanced CAE and structural optimization to deliver superior performance. By reducing the overall weight by approximately 20kg while simultaneously enhancing structural strength, the design ensures both agility and durability. Its updated, fashionable appearance makes it a standout choice for both recreational riding and utility tasks.

Technical Specifications

Engine Displacement	200 cc
Weight Reduction	20 kg

Features

Design Highlights	CAE Optimized, Structural Reinforcement, Lightweight Design, Modern Aesthetics
