

Alloy Steel Grab Hook with Latch

This grab hook is made from durable alloy steel. It features a robust latch mechanism for enhanced safety and load retention in lifting and rigging applications.

Product Overview

High-Strength Rigging Solution

This alloy steel grab hook is engineered for secure and reliable connections in demanding lifting and rigging applications. Featuring a robust latch mechanism, it ensures enhanced safety and superior load retention during operation. Its durable construction makes it an ideal choice for use with chains, ropes, and various lifting accessories in industrial, construction, and marine environments.

Technical Specifications

Suitable Environments

- Industrial
- Construction
- Marine

Material	Alloy Steel
Safety Features	Safety Latch, Load Retention, High-Strength
