Product Overview

High-Strength Alloy Steel Hoist Chain

This alloy steel hoist chain is engineered for demanding industrial lifting and securing applications. Designed with high tensile strength and wear resistance, it provides reliable performance in environments such as construction, manufacturing, and material handling. The chain is available in various finishes and sizes to suit specific operational requirements, ensuring safety and durability for cranes and hoists.

Technical Specifications

Diameter Range	6mm - 32mm
Material	Alloy Steel
Surface Finishes	Black, Galvanized, Self-colored
Chain Type	Drag chain
Model Number	GBJ802-86

Usage & Applications

Common Applications

- Anchor
- Lifting
- Terminal
- Tractor
- Strapping

Logistics

Packaging

- Gunny bag with wooden pallet
- Iron drum

Delivery Lead Time

20-30 days after receiving deposit
