Product Overview

High-Strength Alloy Steel Lifting Chain

This industrial-grade lifting chain is engineered for heavy-duty applications, serving as an essential component for cranes and hoists. Constructed from high-strength forged alloy steel, it offers exceptional durability and wear resistance for demanding environments. The chain's length is fully adjustable to accommodate various lifting heights, ensuring versatility and safety in diverse rigging operations.

Technical Specifications

Quality Grade

G80

Surface Treatment

- Self-color
- Polishing
- Blackened
- Hot-dip galvanized
- Electric galvanized

Material

High strength forged alloy steel

Manufacturing Standards

ISO, DIN, BS, JIS, ASTM

Logistics & Packaging

Available Packaging

- Wooden packing
- Iron drum packing
- Ton bag packing
- Naked packaging
