

Alloy Steel Swivel Hook for Lifting

This rotary safety hook is constructed from high-grade alloy steel. Designed with a new head to prevent decoupling, it deforms gradually under excessive load, ensuring a higher safety factor.

Product Overview

Professional Alloy Steel Swivel Hook

This high-grade alloy steel swivel hook is engineered for professional lifting and rigging applications. It features a 360-degree smooth swivel action designed to prevent cable twisting and binding under heavy loads. Its robust construction makes it an ideal component for integration into cranes, hoists, and various industrial lifting equipment.

Technical Specifications

Load Capacity and Dimensions

Size	Weight	W.L.L	B.L.L
6-8	0.7	1.2	4.8
7/8-8	1.21	2	8
10-8	2	3.2	12.8
13-8	0.35	5.3	21.2
16-8	7.1	8	32
18/20-8	12	12.5	50
