

Aluminium Box Beam Level

This box beam level is crafted with a durable aluminium frame. It is designed to provide accurate horizontal, vertical, and 45-degree measurements using multiple vials.

Product Overview

Professional Aluminium Box Beam Level

This high-quality aluminium box beam level is engineered for precision and durability in demanding construction and carpentry environments. Featuring a robust box-section frame, it provides enhanced strength for long-term reliability on the job site. With three integrated vials, it allows for accurate leveling at 45, 90, and 180-degree angles, ensuring versatile and precise measurement capabilities.

Technical Specifications

Vial Orientations

- 45
- 90
- 180

Accuracy	1 mm/m
Material	Aluminium
Construction	Box Section
Number of Vials	3

Key Features

Features	Aluminium Frame, Box Section, Multi-Angle Leveling
