Product Overview

High-Performance Aluminium Oxide Flap Disc

This aluminium oxide flap disc is engineered for versatile metalworking applications, including grinding, blending, and finishing. Featuring overlapping abrasive flaps on a durable backing plate, it ensures consistent material removal and an extended service life. It is an essential tool for professionals working in metal fabrication, welding, and industrial maintenance.

Applications & Usage

Primary Applications

- Cleaning of welding seams
- Deburring and chamfering
- De-rusting
- Surface preparation for lacquer
- Sanding of wooden surfaces

Target Industries

Carbody Repair, Machine Manufacturing, Switchboard Assembly, Tank Construction, Furniture Manufacturing

Technical Details

Compatible Materials

Steel • Stainless Steel • Metal • Wood • GFK

Key Performance Metrics

1 High

Consistent Cut Rate

1 Yes

Extended Disc Life

Abrasive Material

Aluminium Oxide
