Product Overview

High-Performance AC Condenser

This aluminum AC condenser is engineered specifically for automotive air conditioning systems, ensuring optimal heat exchange performance. By efficiently converting high-pressure refrigerant gas into a high-pressure liquid, it maintains the reliability of your vehicle's cooling system. Constructed from high-grade aluminum, this unit offers superior heat dissipation and enhanced corrosion resistance for long-term durability.

Compatibility & Fitment

OEM Reference Number	64509122825
Vehicle Application	BMW E60 2004-2007, Automatic Transmission Models

Technical Specifications

Primary Function

- Heat exchange
- Refrigerant gas to liquid conversion
- Efficient heat dissipation
- Corrosion resistance

Material	High-grade Aluminum
