

Aluminum Alloy Bicycle Caliper Brake

This high-performance bicycle caliper brake is designed for reliable stopping power. It features a lightweight aluminum alloy construction for durability and reduced weight.

Product Overview

High-Performance Caliper Brake

This aluminum alloy bicycle caliper brake is engineered for riders who demand reliable stopping power and durability. Featuring a lightweight construction and dual linear spring tension adjustment, it ensures smooth and consistent performance across various weather conditions. It is a versatile choice compatible with most standard bicycle frames, making it ideal for road, touring, and hybrid bikes.

Technical Specifications

Material	Aluminum Alloy, Steel
Surface Finish	ED, CP
Tension Adjustment	Dual linear spring

Compatibility & Usage

Recommended Use

Road Bikes • Touring Bikes • Hybrid Bikes

Model Identifier	BK-707008
