

Aluminum Alloy Bicycle Tire Pump

This high-pressure air pump is constructed from aluminum alloy for durability. It features an ergonomic handle, secure valve connector, flexible hose, and stable base for easy bicycle tire inflation.

Product Overview

High-Performance Inflation Solution

The ON-H 320N is a high-pressure air pump engineered specifically for bicycle tires, constructed from durable aluminum alloy for longevity. It features an ergonomic handle and a secure valve connector, ensuring efficient and reliable inflation for various bicycle tire types. The design includes a flexible hose for easy access and a stable base, making it a portable yet professional-grade tool for on-the-go maintenance.

Technical Specifications

Model Number	ON-H 320N
Material	Aluminum Alloy
Key Features	High Pressure, Ergonomic Handle, Flexible Hose, Stable Base, Portable
Application	Bicycle Tire Inflation
