Product Overview

High-Efficiency Aluminum Pressure Cooker

This durable aluminum alloy pressure cooker is engineered for rapid and efficient cooking in professional or home kitchen environments. Featuring a scratch-resistant oxidation surface, it ensures longevity and consistent performance under high-pressure conditions. The unit is designed with safety as a priority, incorporating an eight-core protection system to provide a carefree cooking experience.

Material and Build

Material	Aluminum Alloy
Surface Finish	Oxidation Surface, Scratch Resistant, Abrasion Resistant

Safety Features

Protection Systems

- Eight core safety protection system
- Pressure regulator
- Safety valve
- Secure locking lid mechanism

Design and Ergonomics

Key Design Elements

Ergonomic Handles • Durable Construction • High-Temperature Ready
