Product Overview

Professional Pressure Cooking Solution

This aluminum alloy pressure cooker fry pan is designed for both durability and versatility in professional kitchen environments. Featuring a high-quality oxidized surface finish, it provides excellent scratch and abrasion resistance for long-term reliability. With its integrated eight-core safety protection system, it offers a secure and efficient cooking experience for a variety of culinary applications.

Technical Specifications

Material	Aluminum Alloy
Surface Finish	Oxidized, Scratch and Abrasion Resistant

Safety & Design

Ergonomics

- Dual black side handles
- Secure-fit lid design
- Comfort grip locking mechanism

Safety Systems	Eight-core protection, Pressure release valve, Secure locking mechanism
