Product Overview

Professional Aluminum Pressure Cooker

This high-performance aluminum alloy pressure cooker is designed for efficiency and safety in professional culinary environments. Featuring an advanced eight-point protection system, it ensures secure operation while significantly reducing cooking times for braising, stewing, and steaming. The durable construction includes an oxidation-resistant surface and high-quality heat-insulated handles, making it an essential tool for high-volume, reliable food preparation.

Material and Build

Material	Aluminum Alloy
Surface Coating	Oxidation resistant, Scratch resistant, Abrasion resistant

Safety Features

Included Safeguards

- Safe anti-block hood residue filter
- Enlarged safety valve design
- Controlled pressure release window
- Secure locking mechanism

Safeguards	8 levels
