Product Overview

Professional Pressure Cooker

This high-performance aluminum alloy pressure cooker is engineered for rapid and efficient food preparation. Featuring a robust oxidation-resistant surface and a secure locking mechanism, it offers both durability and long-term reliability for commercial or domestic kitchens. With an integrated eight-core safety protection system, it provides professional-grade security during high-pressure cooking cycles.

Material & Construction

Material	Aluminum Alloy
Surface Coating	Oxidized Surface, Scratch Resistant, Abrasion Resistant

Safety Features

Safety Systems

- Eight-Core Protection System
- Secure Locking Mechanism
- Integrated Pressure Release Valve
- Heat-Resistant Handles
