

Aluminum Alloy Table Mounting Clamp

Constructed from durable aluminum alloy, this table clamp provides a lightweight yet robust solution for securing workpieces. It features a screw-operated vise mechanism and a swivel base for precise, adjustable clamping pressure and optimal positioning.

Product Overview

Precision Aluminum Alloy Table Clamp

This versatile table mounting clamp is crafted from high-quality aluminum alloy, offering a perfect balance of lightweight portability and robust durability. Featuring a precise screw-operated vise mechanism, it provides reliable pressure for delicate tasks such as electronics repair, model building, and jewelry making. The integrated 360-degree swivel base ensures optimal positioning, making it an essential tool for maximizing productivity in compact workspaces.

Technical Specifications

Material	Aluminum Alloy
Swivel Base Rotation	360 degrees
Mechanism	Screw-operated vise

Key Features

Key Benefits

- Corrosion-resistant construction
- Compact design for small workspaces
- 360-degree swivel for optimal positioning
- Ideal for portable and benchtop applications

Application Areas

Ideal Use Cases	Electronics Repair, Jewelry Making, Model Building, Precision Work
-----------------	--
