

Aluminum and PVC Profile End Milling Machine

This end milling machine is designed for aluminum profile end processing and is suitable for various profiles. It can process multi-piece profiles in one clamp, offering high efficiency and convenient tool adjustment to meet different processing requirements.

Product Overview

High-Efficiency End Milling Solution

This end milling machine is specifically engineered for the precision processing of aluminum and PVC window and door profiles. Built for stability and consistent performance, it features a robust design capable of handling various profile sizes and shapes. The integrated control panel and safety features ensure reliable operation, making it an essential tool for high-quality window and door manufacturing.

Technical Specifications

Model	LXDB-250W
Input Voltage	380V/50Hz

Performance Metrics

Input Power

8.8 kW
Total Power

Motor Rotation Speed	2800 r/min
Operating Air Pressure	0.5~0.8 MPa
Air Consumption	180 L/min

Processing Capabilities

Compatible Milling Cutter Diameters

- 250
- 300

Worktable Range	1400 mm
Max Processing Hole	40 mm
Adjustment Range	85 mm

Physical Dimensions

Overall Dimensions	3300 x 1200 x 1700 mm
