Product Overview

High-Performance Aluminum Camlock Coupling

This aluminum camlock coupling serves as a reliable female thread adapter designed for rapid connection and disconnection of hoses and pipes. Engineered for efficiency, it eliminates the need for tools, saving significant time compared to traditional flanged or threaded fittings. Its lightweight, durable aluminum construction provides excellent abrasion resistance, making it an ideal solution for secure fluid, powder, and pellet transfer in various industrial applications.

Technical Specifications

Body Material	Aluminum
Available Sizes	1/2" to 8"
Thread Options	NPT, BSPP, BSPT
Seal Materials	NBR, BUNA, EPDM, VITON
Standards	A-A-59326, DIN 2828

Performance Metrics

Performance Ratings

250 psi

Max Working Pressure

-150 F

Min Temperature

250 F

Max Temperature

Hardware Components

Component Materials

Component	Material Options
Pins, Rings, Safety Clip	Carbon steel (plated) or Stainless steel
Handles	Brass or Stainless steel
