Product Overview

Professional TCT Saw Blade

This high-quality tungsten carbide tipped (TCT) saw blade is engineered for precision cutting applications. Featuring robust YG8 grade carbide tips and a high-strength steel body, it provides superior durability and efficient cutting performance. Designed to minimize vibration and noise, this blade is an ideal solution for achieving clean, burr-free cuts in professional and industrial environments.

Technical Specifications

Quality Standards

MPA Certified

Tip Material	YG8 Tungsten Carbide
Blade Body Material	50# Steel, 65Mn

Service & Logistics

Customer Assurance

We are committed to product quality. In the event of performance issues, please provide a detailed report for analysis. If the issue is manufacturing-related and cannot be resolved, a replacement will be provided.
