

Aluminum Electronic Panel with Cutouts and Perforations

Aluminum panel designed for electronic devices. It features cutouts for screens and controls, along with perforations for speakers or ventilation.

Product Overview

Professional Electronic Enclosure Panel

This high-quality aluminum panel is designed for electronic integration, featuring precision-engineered cutouts and integrated perforations. The brushed metallic finish offers a sophisticated, durable aesthetic suitable for professional-grade electronic device casings. The panel design incorporates specific regions for display interfaces, control modules, and ventilation, providing a versatile solution for modular hardware assembly.

Technical Specifications

Material	Aluminum
Surface Finish	Brushed metal

Design Features

Integrated Cutouts	Large screen cutout, Control interface area, Circular button ports
Ventilation	Yes
Form Factor	Panel-mount
