

Aluminum Frame Road Bicycle

This road bicycle has a lightweight aluminum frame and drop handlebars. It features a Shimano drivetrain for smooth shifting, caliper brakes, and aerodynamic wheels.

Overview

High-Performance Road Bicycle

This road bicycle features a lightweight aluminum frame designed for speed and efficiency. Equipped with a precision drivetrain and reliable caliper braking, it is engineered for road cycling, fitness training, and competitive racing. The aerodynamic wheelset ensures enhanced performance on every ride.

Key Features

Performance Highlights

1 Aluminum

Frame Material

Best For

Road Cycling, Racing, Fitness Training
