Product Overview

High-Performance Aluminum Lever Chain Hoist

This manual lever chain hoist is engineered for demanding industrial and construction environments, featuring a durable yet lightweight aluminum alloy frame. Its compact design allows for easy portability and operation in confined spaces, while the robust reduction gear system significantly reduces the required operation force. Built for safety and reliability, it includes a double pawl brake system and high-strength alloy steel chains, ensuring stable load control and long-term endurance.

Technical Specifications

Available Capacities	0.25t, 0.5t, 0.75t
Standard Lift	3 m
Chain Diameter	6 mm
Endurance Standard	EN 13157

Performance Features

Key Safety & Build Features

- Double pawl brake system for stable braking
- Impact resistant aluminum covers
- Compact frame design
- High-strength alloy steel chain
- Includes tool bag (for 0.25t, 0.5t, 0.75t models)
