

Aluminum Oxide Coated Abrasive Roll

This coated abrasive roll features special aluminum oxide and a flexible cloth backing. It has good toughness, low stretch, a special top coat, and is heat-resistant and anti-clogging.

Product Overview

High-Performance Abrasive Roll

The TA622J Aluminum Oxide Coated Abrasive Roll is engineered for professional sanding and finishing applications. Featuring a durable J-weight cotton backing and precision-graded abrasive grain, this product ensures consistent material removal and extended service life. It is versatile enough to be used on wood, metal, and plastics, making it an ideal choice for both handheld and machine-based sanding operations.
