

Aluminum Oxide Coated Abrasive Roll

This abrasive roll features a special aluminum oxide coating and semi-closed coat. The E-paper backing provides an antistatic quality suitable for use on wood materials like pine, timber, furniture, and flooring.

Product Overview

High-Performance Coated Abrasive Roll

This aluminum oxide coated abrasive roll is engineered for demanding industrial applications requiring consistent material removal and superior durability. Featuring a robust E-weight paper backing, it provides the structural integrity needed for heavy-duty sanding and finishing tasks. Its precision-engineered grain ensures a high-quality surface finish across a wide variety of materials.

Technical Specifications

Available Widths

- 1250mm
- 1400mm
- 1650mm

Backing Material	E-weight paper
Abrasive Grain	Aluminum Oxide (A)
Bonding	Resin over Resin (R/R)
Grit Range	P40 - P1000
Product Code	PA233E
