

Aluminum Pressure Cooker for Efficient Cooking

This aluminum pressure cooker is designed for efficient and safe cooking. It features a durable construction, secure locking mechanism, and pressure release valve for optimal performance.

Product Overview

High-Efficiency Aluminum Pressure Cooker

This professional-grade pressure cooker is engineered from high-quality aluminum alloy, featuring a polished surface for durability and easy maintenance. Designed with safety at the forefront, it incorporates multiple mechanisms, including a spring valve, alarm valve, and pressure limit valve to ensure secure operation. With an optimized working pressure of 80Kpa, this cooker is an essential tool for efficient, high-volume food preparation in demanding kitchen environments.

Technical Specifications

Working Pressure	80 Kpa
Material Construction	Aluminum Alloy, Polished Surface

Safety Features

Safety Devices

- Automatic safety device for opening and closing
- Spring valve
- Alarm valve
- Pressure limit valve
- Safety outlet for excessive pressure release

Model Variants

Available Models

Model	Diameter	Capacity
APC-20K	20CM	4.0L
APC-22K	22CM	5.0L
APC-24K	24CM	7.0L
APC-26K	26CM	9.0L

Customization Options

Available Upgrades

Anodized colorful lid • Induction base
