

Aluminum Radiator for Heat Dissipation

This aluminum radiator provides efficient energy saving and environmental protection. It has a size of 582 * 80 * 85, 0.38 L add bassoon, weight of 1.40 KG, working pressure for 10 to 18 palmer, cooling area of

Overview

High-Efficiency Aluminum Radiator

This aluminum radiator is engineered for superior heat dissipation, offering excellent energy efficiency and environmental protection compared to traditional metal radiators. Designed for reliability, it features a durable construction suitable for various industrial cooling applications. Its optimized thermal conductivity ensures consistent temperature control and prevents overheating in demanding environments.

Physical Dimensions

| | |
|------------------------|------------------|
| Dimensions (L x W x H) | 582 x 80 x 85 mm |
| Weight | 1.4 KG |

Performance Metrics

Key Performance Metrics

| | |
|---------------------------------|--|
| 0.38 L Water Capacity | 3.2 M² Max Cooling Area |
| Working Pressure | 10 - 18 bar |

Logistics & Packaging

Packaging

- Bubble bag protection
- Carton box
